

Mockup Review Notes

General Notes:

- Overall prefer mockup A. Feels warm and inviting! The black bars on the 2nd page make the site feel restrictive
- I think there could be a “Home” or “About” tab in the navigation bar, which could lead to the home page. The logo could do the same thing.
 - o Since that would make the tabs uneven, maybe push the logo up to above the nav tabs
- For the nav bar, prefer a lineless font
- Try experimenting w/ the text on the nav bar extending across the whole bar? At least a little bit wider than the margins of the main page
- It would be good if description for each tab was as wide as the description on the home page. This would help draw attention to it first. I like the black bars on Mockup B
- It would be good to have image decorations where the margins are. (black lined images) It can be a repeating pattern too

Character Profiles

- I like how each character description is placed in a box in mockup B. However, I like the hearts being placed behind the characters.
