Project Title: Beatcats

I'd like to build this site as multiple pages, rather than a long, single page website. Typical site navigation probably across the top. I think there is plenty of content and photography to build out individual pages.

I want to build this site with multiple pages: a home page, character list, song list, and extras. There would be a navigation across the top. The character list and extras could either have a drop-down function or just be a singular page each.

- **Home Page/Introduction** – Includes the introduction and overview of the Wikipedia page. Info on what Beatcats is, the companies that produced them, designers, etc. Can include the app in here. Activity stopped around mid 2023

- **Character list** – info on each member of the band. Nicknames, catchphrases, personalities, interests, etc.
    o Mia (vocalist)
    o Chealsea (vocalist)
    o Ruci (dancer)
    o Leila (rapper)
    o Emma (generalist?)

- **Songs** – a list of songs and albums

- **Merchandise**

- **Extras** – other information that doesn't have it's own page
    o Beatcats girls – a jp performance girl group
    o Sanrio Character Awards ranking for 2021 through 2024
    o Necosta – short web series
    o Mewsic Countdown – short animated performances series
    o App - Beatcats OFFICIAL FANCLUB

- **Sources** – various list of sources
    o https://en.wikipedia.org/wiki/Beatcats
